

## QUALITY POLICY

The profitable operation at **ZKI Zrt.** can only be ensured in the long term by keeping the standards of our products and services at the highest possible level, as required by our partners and stakeholders. The reputation and market positions of our organisation are strengthened by quality meeting the requirements and by effective and efficient quality management; therefore we attach priority importance to activities facilitating the attainment of our objective through improving quality and quality management, as well as the development of our services. The operation of our quality management system must ensure that our core operation satisfies the requirements of our buyers and stakeholders, the relevant domestic and, as the case may be, international, regulations, as well as that it ensures the implementation of our policy, with a view to the profitability of **ZKI Zrt.** and the livelihoods of our employees. To accomplish our goals:

- We determine our plant breeding objectives and the attributes to be integrated in our new varieties based on an assessment and understanding of the market's requirements.
- We spare no effort to satisfy the widest possible range of our partners' requirements.
- Our quality management system is operated in accordance with the ISO 9001-2015 standard.
- The producers we conclude contracts with are selected in view of the local conditions for crop production and our partners' technical/professional expertise and reliability.
- We intend to develop our seed processing and packaging system and introduce new products, to meet market demand.
- We maintain the accreditation of our seed testing laboratory in accordance with the applicable regulations and continue to improve its capacities.
- We maintain the efficiency and quality achieved by previous development projects in the entire seed supply process and by regular, documented checks and inspections we ensure that the products we deliver are always of the highest possible quality.
- We continuously provide our employees with training to make sure that they can perform their work at ever increasing standards, always in line with the prevailing regulations.

Working to high quality standards is a responsibility of every one of our employees, which they must guarantee by setting personal examples and by correct communication with our customers and stakeholders.
